TSG-100VAC

100V-Line Level Audio Converter

2CH Speaker Level to Line Level Conversion | Compact Chassis Design | No External Power Required

This TSG-100VAC is a high to low level converter designed to interface with 100V distributed speaker lines. Ideal for signal transmission over long distances or supplying an auxiliary output from PA amplifiers or from a 100V audio signal source to the units with line input. Very useful if extending or adding to existing installs as it avoids the need to run new cables from existing amplifiers or main equipment, simply tag onto the 100V loudspeaker circuit and feed the output into a local amplifier.

Key Features

- 2CH Speaker Level to Line Level Conversion
- Phoenix Connectors for Input & Output
- Works with 100V Speaker Systems

Technical Specifications

Model	TSG-100VAC
Input	2 x High Level Input (100V)
Output	2 x Line Level Output
Input & Output Connector	Phoenix connector
Chassis Color	Chassis
Power Requirement	None
Dimension	136mm(W) x 80mm(D) x 30mm(H)
Net weight	0.45kg
